

## Isolocork Filler primer - specs

### Product Identification

Isolocork Filler Primer

#### Description:

Aqueous acrylic based primer.

#### Density:

23°C: 1,325 +/-0.08

#### Properties:

This primer is used as an anti-bacterian, adhesion promoter, substrate binder and increases Isolocork Filler yield.

Product supplied with the Isolocork Filler color, easy application, excellent penetration and substrate adhesion.

#### Surface Preparation:

Surfaces must be dry, greaseless, without debris or detaching parts.

Apply one coat without dilution. The application can be made by brush, roll or projection.

#### Attention:

Do not apply in surfaces with ice or at risk of freezing in the next 24 hours.

Avoid applying with strong direct sunlight.

#### Drying:

Hand touch between 30 to 60 minutes.

For second coat application between 4 to 8 hours.

#### Theoretical Yield:

Between 8 to 10m<sup>2</sup>/lt/coat

#### Storage:

In original packaging, away from sunlight, in a cool dry place. Storage time is approximately 12 months.

After opening the package, it must be used in the shortest possible time.
